To Whom It May Concern:

I am pleased to confirm that Michal Kučera has done an outstanding job during his 3-month internship with Google here in New York City between February 10, 2020 and May 15, 2020. Michal has worked directly under my supervision and has demonstrated great independence, initiative and knowledge across the domains of computer graphics, animation and human-computer interaction.

As part of the internship, Michal collaborated with my team on the development of novel rendering and 3D animation systems in C++ and JavaScript. He worked both on the core algorithms as well as human interaction elements, and learned and applied best practices of software engineering such as detailed documentation and rigorous unit testing. The team was spread out between the west and east coasts of the US, and Michal has consistently cooperated well with the rest of the team.

I look forward to collaborating further with Michal in the future, and wish him the best for the remainder of his studies.

Sincerely,

Dominik Kaeser
Staff Engineer
